

CUPE 4153 Update

November 11th, 2024

Yeah, I goofed it up....

This is a correction to the message about doors being opened, closed or locked last Friday.

I was wrong when I stated that during evening rentals, the doors are keyed open 15 minutes prior to the rental while rental permit people let their people in and 15 minutes after the rental starts the doors are locked. This is incorrect.

For evening rentals, caretaking staff will meet rental permit holders at the designated door 15 minutes prior to the rental starting. Permit holders will be let in and they are responsible for only allowing approved attendees into the building. Caretaking staff do not unlock the doors and they are not to be wedged or propped open in any way by the rental permit holders.

I apologize for the miscommunication for everyone and hope this clarification helps.

Cheers,

Blake
